EXPERIENCE

March 2019 - Present
Front End Engineer
EverlyWell Inc, Austin, TX
Using React and the latest front end technologies to rebuild the health results platform, create and maintain reusable components in the shared component library, and build new front end repositories for new code initiatives.

March 2017 - Jan 2019
Full Stack Node/React Engineer
Sumo.com, Austin, TX
Built marketing tools for small businesses via a full-stack JavaScript platform. Created and maintained app features using React/Redux and Sass, crafted new back-end routes and queries via Node.js, Express, MySQL and Sequelize, crafted emails and sent notifications with Sendgrid and Foundation for Emails, coded server cron jobs, maintained internal admin dashboards for the sales and marketing teams, and crafted new Sumo landing pages.

Oct 2013 - Mar 2017
Lead Full Stack Engineer
Service Operations Specialists, Inc., Little Rock, AR
Designed and implemented three major web applications from inception for consultant, employee and client use via the LAMP stack, including all facets of database design, server-side coding and the user interface for over 700 users in over 200 locations. Stack includes PHP, MySQL, JavaScript, React.js, and Foundation.

ABOUT

Full stack engineer having a great time building modern technological marvels.

Primarily self-taught, I built several web applications for a small automotive consulting business in Arkansas. Learning by necessity is invaluable.

Inspired by Austin's tech scene, I moved to Austin to train with more experienced developers before working for local startups and teaching kids how to code with Hello World Studio.

I believe that coding is the purest, most beautiful melding of creativity and logic.

EDUCATION

The University of Texas at Austin
The Coding Boot Camp At UT Austin
Certificate Awarded: February 2017
