EXPERIENCE

March 2017 - Present
Software Engineer
Sumo.com, Austin, TX
Building awesome tools for small businesses via a full-stack JavaScript platform. Creating and maintaining app features using React/Redux and Sass, crafting new back-end routes and queries via Node.js, Express, MySQL and Sequelize, building and sending email notifications with Sendgrid and Foundation for Emails, crafting server cron jobs, and maintaining our internal admin tools for sales and marketing using html templates and some old-school jQuery.

Aug 2017 - Present
Web Development Instructor
Hello World Studio, Austin, TX
Teaching middle school kiddies how to code websites and drones, one student at a time.

Oct 2013 - Mar 2017
Lead Full Stack Web Developer
Service Operations Specialists, Inc., Little Rock, AR
Designed and implemented three major web applications from inception for consultant, employee and client use via the LAMP stack, including all facets of database design, server-side coding and the user interface for over 700 users in over 200 locations. Provided full program maintenance, upgrades and user support.

ABOUT

Full stack JavaScript developer having an awesome time working with the brightest minds at Sumo.com.

Primarily self-taught, I hit the ground running by learning on the job, and created several web apps for a small automotive consulting company in Arkansas. Learning by necessity is invaluable.

Constantly fueled by a stream of digital curiosity, I believe that coding is the purest, most beautiful melding of creativity and logic possible.

EDUCATION

The University of Texas at Austin
The Coding Boot Camp At UT Austin
Certificate Awarded: February 2017
